

# Ant Addition Game

## Common Core Standard

Math.Content.  
1.OA.C.6

Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g.,  $8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$ ); decomposing a number leading to a ten (e.g.,  $13 - 4 = 13 - 3 - 1 = 10 - 1 = 9$ ); using the relationship between addition and subtraction (e.g., knowing that  $8 + 4 = 12$ , one knows  $12 - 8 = 4$ ); and creating equivalent but easier or known sums (e.g., adding  $6 + 7$  by creating the known equivalent  $6 + 6 + 1 = 12 + 1 = 13$ ).

## Learning Objective

**Addition Facts Mastery** This game allows students to practice their addition facts with sums of 10-15.

## Materials Needed

A game piece for each player  
A game board  
Game cards

## Directions

This is a 2 to 3 player game. Players take turns drawing cards. They solve the problem on the card and move their piece to the first space with the correct sum. The first person to get to the end wins. If they land on a leaf with an ant holding it the player gets to go again.
