

Thank you for downloading Counting Kitchen-Macaroni and Cheese. These file folder games help students learn to count by having them make some of their favorite foods. In this case Macaroni and Cheese.

In this package you will find 5 different Macaroni and Cheese recipes. In each recipe children will prepare to cook by counting out the ingredients they need by placing them on the counter.

There are two different counting board mats that they can use, depending on their knowledge of numbers.

For a real life math connection you can also have them assist in making the actual recipes. I've included links to each recipe online at the end of this document.

I've also included two pouches to put away your recipe cards and ingredients after you finished with the game.
